Exercises 1 Sets Set, element, empty set, subset, intersection, union, complement

Objectives

- understand what a set, an element of a set, an empty set, a subset, an intersection, a union, a complement is.
- be able to perform basic set operations.

	1	•				
Probl	ems					
1.1	Look at the sets A, B, and C:					
	A = Set of all cities of the world B = Set of all European cities C = Set of all coastal cities of the world					
	Find at least four elements of the following sets:					
	a)	$B \cap C$	b)	B\C		
	c)	$C \setminus B$	d)	$A \setminus (B \cup C)$		
1.2	Harshbarger/Reynolds*: Chapter 0 (Algebraic Concepts), Section 0.1 (p. 2-9) (Scanned pages 2-55 and A1-A5 in file "Algebraic Concepts.pdf" on Moodle)					
	a)	Theory (p. 2-6)	b)	Exercises (p. 6-9)		
		-		In International Applications for the Management, Life, and So Boston / New York 2007, 8th edition, ISBN 978-0-618-7316		
1.3	Decide which statements are true or false. Put a mark into the corresponding box. In each problem a) to c), exactly one statement is true.					
	a)	A is any set.				
	b) A = Set of all cities of the world B = Set of all European cities					

c) A and B are any sets.

 $A \cup B = A$ $B \in A$ $B \subset A$

$(A \cup B) \subset (A \cap B)$
$(A \cap B) = (A \setminus B)$
$(A \cup B) = (A \setminus B) \cup (B \setminus A) \cup (A \cap B$
$(A \cap B) = (A \setminus B) \cup (B \setminus A) \cup (A \cap B)$

Answers

- 1.1 a) $B \cap C = \{Lisbon, Copenhagen, Barcelona, Naples, Stockholm, ...\}$
 - b) $B \setminus C = \{London, Paris, Madrid, Berlin, Rome, ...\}$
 - c) C \ B = {Tokyo, San Francisco, Sydney, Rio de Janeiro, ...}
 - d) $A \setminus (B \cup C) = \{Chicago, Mexico City, Nairobi, Beijing, ...\}$
- 1.2 see Harshbarger/Reynolds: Chapter 0, Algebraic Concepts (Scanned pages 2-55 and A1-A5 in file "Algebraic Concepts.pdf" on Moodle)
- 1.3 a) 2nd statement
 - b) 4th statement
 - c) 3rd statement
